

injeTAK®

CYSTOSCOPY NEEDLE FOR PRECISE PLACEMENT

Innovation for Pelvic Health

PATENTED DEPTH DIALING FOR ACCURACY, SAFETY AND SPEED

injeTAK®

UNMATCHED PATIENT TREATMENT AND SAFETY

- For cystoscopy injections into the bladder wall for Overactive Bladder (OAB) and Neurogenic Detrusor Overactivity (NDO)
- Accurate, safe dispensing with decreased procedure time

OPTIMIZED ADJUSTABILITY

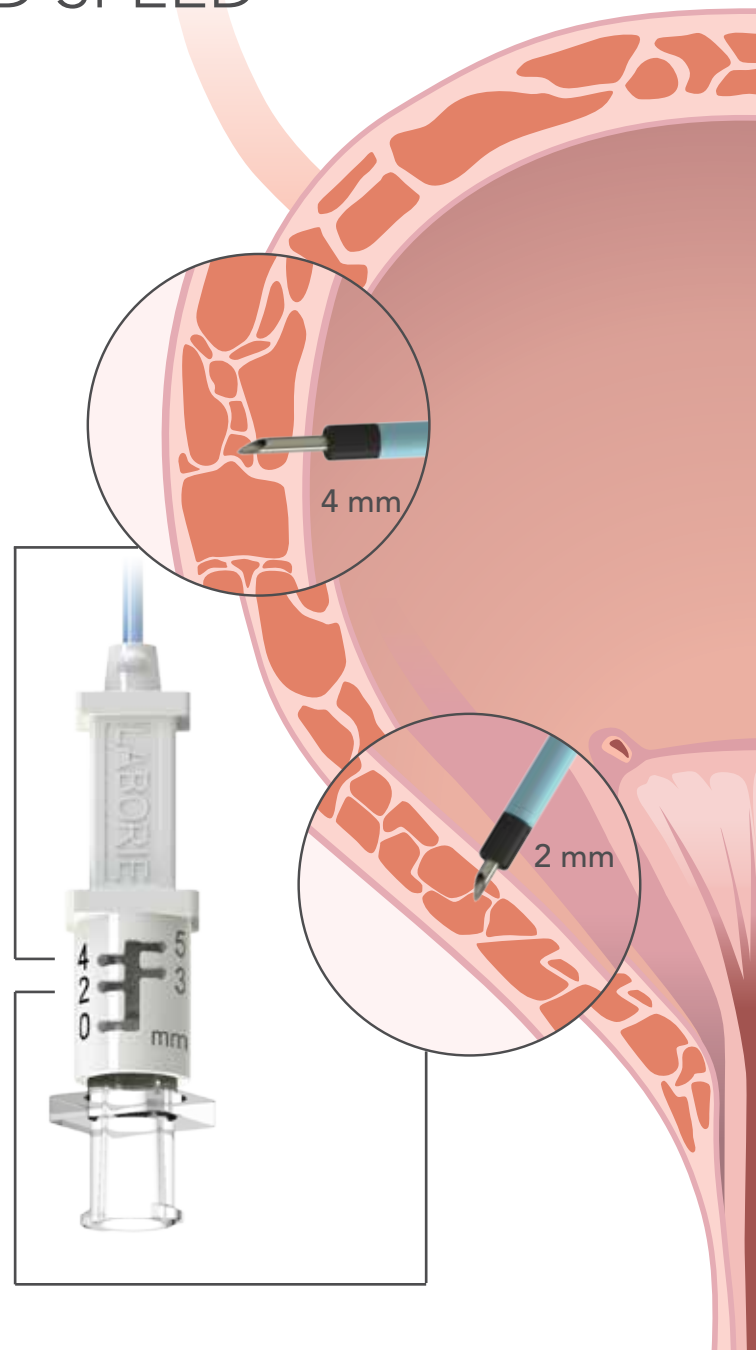

- Retractable needle protects needle tip and cystoscope
- Does not require introducer sheath
- Needle tip can be adjusted to 0, 2, 3, 4 and 5 mm to accommodate bladder wall thickness
- Settings provide optimal tip length for speed, safety and consistency (2 mm per RX manufacturer's PI)
- Ergonomic design allows for easy tip adjustments

NEEDLE CHARACTERISTICS

- 4.8 Fr allows for use with smaller working channels and most pediatric scopes
- Black indicator tip provides visual proximity to tissue for accurate placement, safe penetration and gauged puncture depth
- Precise angle and 3-bevel tip engineered to minimize puncture force
- Unique cannula design provides easy injection and superior flexibility while maintaining structural integrity

AVAILABLE SIZE OPTIONS

- 35 cm – DIS199
- 70 cm – DIS201
